

Computer Science Graduate

SOFTWARE ENGINEER & FULL-STACK WEB DEVELOPER

Email: developer@example.com

Phone: +91 98765 43210

GitHub: github.com/dev-portfolio

EDUCATION

Bachelor of Computer Science

2023 – 2027

XYZ University

- Focused on software engineering, web technologies, and data structures.
- Actively learning advanced topics in design patterns, system architecture, and predictive database management.

TECHNICAL EXPERIENCE

Frontend Development Intern

Summer 2025

ABC Tech

- Worked on responsive UI components and collaborated with developers to improve user experience.
- Utilized modern front-end frameworks and responsive frameworks like Bootstrap to optimize multi-device web layouts.
- Participated in daily agile stand-ups and code reviews to maintain cross-functional design patterns.

PROJECTS & COMPETITIONS

Hackathon Participant / Core Developer

2024

National Coding Fest

- Built an AI-powered student productivity application with a team of developers.
- Integrated smart task scheduling algorithms to automate and streamline study workflows.
- Handled the full-stack architecture mapping out robust logic and database interactions.

Placement Readiness & Market Fit Platform

2026

Independent Project

- Developed a robust Flask-based web application with an SQLite backend to evaluate and validate students' technical skills.
- Integrated Gemini AI API to provide automated predictive analytics, real-time skill assessment, and personalized interview readiness metrics.
- Designed professional, intuitive, and modular full-stack architectural flows ensuring decoupled database and interface layers.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3

Frameworks & Tools: Flask, Bootstrap, Node.js, SQLite, Git, GitHub

Specializations: Generative AI Integration, Automation Workflows (n8n), Responsive Web Design, Core Data Structures
